

2014 Radio Station Inspection Program Status

There have been 870 inspections completed this year.

Inspections currently in progress for October 2014 are in Denver and Florida.

Goal for 2014 is 1000 stations.

Problems Found During Inspections

- Additional radios found on frequencies that were not included on the station license.
- Radios licensed, but not being used and need to be decommissioned.

- Transmitters not marked with the licensed frequency.
- Customers are using frequencies that they are not licensed for.
- Unlicensed radios found that nobody knows who they belong to or if anyone is using them.
