

2014 Radio Station Inspection Program Status

There have been 483 inspections completed this year

Inspections currently in progress for June 2014 are in Nebraska, South Dakota, Tennessee, and New York

Goal for 2014 is 1000 stations

Problems Found During Inspections

- Additional radios found on frequencies that were not included on the station license
- Radios licensed, but not being used and need to be decommissioned

- Transmitters not marked with the licensed frequency
- Customers are using frequencies that they are not licensed for
